Michigan EMS applauds House for budget investments to make sure emergency services can be provided efficiently to residents

Essential investments ensure critical public health and safety

After the Michigan House approved its version of the Fiscal Year 2027 budget including investments in emergency services, the Michigan Association of Ambulance Services Executive Director Angela Madden issued the following statement:

“Michigan EMS providers give their all to protect the health and safety of residents across the state and shouldn’t have to worry about how they will be compensated for doing their duty. Making budget investments to ensure that EMS has funding to effectively serve its residents is critical to the public health and safety of our residents. The budget approved by the Michigan House today makes smart investments that will let our agencies do what they do best-- provide excellent pre-hospital care to Michigan residents. We are grateful for the leadership and support of Michigan House members and urge inclusion of these commonsense investments in the final budget.”
